### Design Excellence

Aztec's flexible design meets all roofing needs. Sleeve flexibility accommodates vibration and pipe movement caused by expansion contraction. The soft aluminum base easily conforms to most metal roof profiles.

### Weather Protection

Made of E.P.D.M. or Silicone, these flashings are compounded specifically for maximum resistance to weathering due to ozone and ultraviolet light.

### Base Flexibility

The base is designed to form a seal on most panel configurations and roof pitches regardless of pipe location.

### Easy On-Site Customization

Fast, one piece construction allows for easy on-site installation in usually 5 minutes.

### Modification Made Simple

Easy to see pipe diameters make for painless on-site installation.
